Introduction

This is a guidance document created to assist applicants to this call in the completion of their proposal. It is specific to this call and should be used in conjunction with the following information:

- [ESRC Research Funding Guide](#)
- [ESRC International Co-Investigator Policy](#)
- [Call-specific guidance](#)
- [Je-S help text](#) which is available in every page of your Je-S form, simply click on the question mark against any section (or on the word 'Help' in the top right hand corner of each page)

Important: Where information and guidance issued in this document differs from the general guidance offered in these sources; you should adhere to the guidance in this document.

If you experience difficulties using Je-S or have questions regarding its use, contact:

- Je-S helpdesk
Email: jeshelp@rcuk.ac.uk
Telephone: +44 01793 444164

The helpdesk is open Monday-Thursday 08:30-17:00, Friday 08:30-16:30 (excluding bank holidays and other holidays). If calling out of hours, please leave a voice message.

When reporting problems by email or telephone, please provide:

- Name
- Organisation
- User ID
- Date and time of the issue
- What part of the form or system you were working on
- The nature of the problem.

Joint Electronic Submissions (Je-S)

All proposals under this call must be completed and submitted through the Joint Electronic Submissions (Je-S) system. To be able to do this the organisation must be registered for Je-S, and the applicants must hold Je-S accounts.

Proposals can be submitted by UK higher education institutions and other independent UK research organisations which are recognised institutions on Je-S. (A list of these organisations is available from the Je-S login page. The organisation will have set up the Je-S submission process and will therefore be available within the Je-S searches.)

Je-S accounts for applicants

All principal and co-investigators must have a Je-S account which has been verified by a third party before they can be found in searches within the Je-S System and added as an applicant. To get started on creating an account please refer to the [Je-S help text](#) and select 'Setting up a Je-S Account'. Please ensure that applicants select the 'Account Type: Research Proposal' and the option 'An Applicant on a Standard or Outline Proposal'.

It is recommended that applicants forward their proposal to the organisation submitter pool in good time before the call deadline to allow a sufficient period for the approval and final submission process. The proposal must be submitted through the Je-S System to ESRC by the institution's nominated contacts. Once the applicant completes and submits the proposal, notification is then sent to their organisation's 'submitter' to action. The 'submitter' is the person in that organisation authorised to approve the proposal and carry out the final stage of submission.

The applicant will receive an email confirming that the proposal has been submitted to the submitter pool - this means the proposal is still with the organisation but is **not yet submitted to the research council**. The final submission process is the responsibility of the host institution, and we cannot accept responsibility for any delay which may occur at this stage. We strongly advise applicants to check that they receive an email confirmation from the Je-S System confirming that the proposal has been submitted to the research council.

Use of your personal information – UK Research and Innovation understands the importance of protecting personal information and is committed to complying with the General Data Protection Regulation 2016/679 (GDPR). It is committed to fostering a culture of transparency and accountability by demonstrating compliance with the principles set out in the Regulation. More information can be found at [UKRI's full GDPR Policy](#).

Before creating your proposal

Applications may **only** be made on Joint Electronic Submission (Je-S) forms.

Please note that the deadline for research organisation submission of proposals is **16:00 UK time on 11 April 2019**. You should **allow sufficient time for completion of the research organisation submission process checks/authorisation**. You can view all Je-S registered organisations via the Je-S login page to ascertain whether the proposed submitting organisation is registered.

There is a **further layer of administration between your submission of the proposal and the proposal being submitted to the research councils, via Je-S**. The research organisation's submission route usually includes both an approver (i.e. head of department) and submitter (i.e. central finance office), and UKRI cannot accept responsibility for any delay which may occur as a consequence. We strongly advise applicants to secure confirmation from their relevant administrator that the proposal has been successfully submitted to the Je-S team (see also 'Tracking your proposal').

Creating your proposal

[Log in to Je-S](#)

Select 'Documents'

Select 'New Document'

Select 'Call Search'

When prompted, type in the call title **UKRI-GCRF Education as a Driver of Development and Gender** and select from the list created. (Please note that this call name is restricted by character length and refers to the Network Plus call for **Gender** and Intersectionality and for **Education** as a Driver of Sustainable Development.) The remaining three selection fields should automatically populate as follows:

Select Document Type: Standard Proposal

Select Scheme: ODA

Select Call/Type/Mode: UKRI-GCRF Education as a Driver of Development and Gender

Select the 'Create Document' button.

It is the **applicant's responsibility to ensure that the proposal is created and submitted against the correct call** (and consequently correct scheme). We will **not accept** proposals for processing that are not submitted using the above call route.

Completing your proposal

The initial Je-S document instructions page will give you general guidance on the navigation layout, specifically icon descriptions.

The left hand column 'Document Menu' lists all the sections associated with this call and clearly identifies which ones are mandatory (red cross, turning to green tick when completed).

The details below are not an exhaustive step-by-step guidance, and we recommended that you refer to the Je-S help text for additional information.

Please note you may return to edit saved documents at any time.

Project details

- Select organisation and department from drop down lists
- 'Your Reference' should be supplied by your research organisation (consult your research office). If your administration office does not have a system for referencing grant proposals, a suitable reference of your own choice will be acceptable. Use "Your reference" to help distinguish easily between proposals in users' Current Documents lists. The reference is intended to be a unique identifier for the proposal, and is unrelated to the reference that the organisation would be asked to provide if a grant were awarded.
- Enter 'Project Title' ensuring that the first word is either **Gender** or **Education** to identify which theme you are applying to (maximum limit of 150 characters)
- For 'Proposal Call', select **UKRI-GCRF Education as a Driver of Development and Gender**.
- Your start date should be **1 November 2019**. Your grant should be a proposed duration of **no more than 48 months** for the **Gender** theme or **36 months** for the **Education** theme.
- Submission route – It is recommended that once this initial section is completed, you check the submission path (via Document Actions tab) to see if the proposal has

been signed off by submitters and approvers, in which case please make sure they will be available to process the document on the day you intend to submit it to the research council.

Investigators

Enter the name of the principal investigator (PI) and all co-investigators (Co-Is).

Investigators should be from more than one research organisation, but the PI must be from the organisation that will administer the grant. The PI will take intellectual leadership and manage the activities of the grant; this individual will be the contact person for research council correspondence. All named investigators are responsible for ensuring that successful proposals are undertaken and completed in the manner specified.

Please note that it is mandatory that you answer positively to the question 'Post will outlast project?' To clarify, there is an expectation that the PI's post will be in place for the duration of the project.

Researchers can be involved in proposals to more than one of these calls, providing they have the time available to commit to them should all be successful. However researchers cannot apply for the same research activity from more than one call at once.

UK co-investigators in business, civil society or government bodies

Please note that any researcher from an established business, civil society or government body based in the UK will be eligible to be listed as a **co-investigator** under this call.

The ESRC will fund 100% of justified costs, however, the project costs associated with these types of Co-I contributions must not exceed 30% of the overall cost of the grant (at 100% fEC). Applicants should note that where a proposal includes UK business, third sector or government body co-investigators the combined costs of all co-investigators must not exceed the 30% maximum limit.

Please note that costs **cannot** be claimed from government bodies.

On receipt of the proposal, the eligibility of business, civil society or government bodies will not normally need to be checked if it is reasonably clear that they are appropriate to conduct the work. Where there is doubt, checks will be carried out should a positive funding decision be made.

It is recommended that potential UK co-investigators from business, civil society or government bodies contact the Je-S Helpdesk (jeshelp@rcuk.ac.uk) if their organisation is not selectable as part of the Je-S person account registration process. These organisations will then be added to the Je-S database, which will allow relevant selection as part of the required person account registration process (that co-applicants are obliged to initiate, via the login page).

All project costs relating to UK business or civil society co-investigators must be prefixed as 'UK Co-I's business or civil society costs' and must be entered into the costs section on Je-S as follows:

Co-investigator 'time' allocation must be entered under the standard Co-I section, but the salary rate must be entered as zero. The co-investigator salary costs must then be entered under 'Other Directly Incurred Costs' (please tick the 'Is Exception' box to ensure 100% costs claimed), as should all other claimed staff salaries and related costs associated with the UK Co-I's business or civil society body.

All costs must be specifically justified, and applicants must explain why such costs are required to achieve the aims of the project. Applicants must also state clearly in the 'Justification for Resources' attachment of the Je-S form which costs in the proposal relate to the UK co-investigator's business, civil society or government body. Please note that UK co-investigator's business or civil society salary costs should only be claimed where clear justification is provided as to why this cost cannot be met by the UK co-investigator's business or civil society organisation.

Host/submitting institutions are reminded that for calls that encourage non-academic co-investigators, a suitable support structure should be in place to assist such individuals in registering for Je-S accounts and contributing to the research case.

International co-investigators

This call will follow standard ESRC policies in that the ESRC will fund 100% of the justified costs for international co-investigators from research organisations of comparable standing with UKRI recognised UK research organisations. ESRC's policy on the [inclusion of international co-investigators](#) will apply, with the exception that for the GCRF Collective Fund Programme calls **there is no cap on costs** associated with international co-investigators' contribution relative to the total project cost; no upper limit will be applied. This applies to all international co-investigators from all countries, whether on the [DAC list](#) or not, but all costs need to be fully justified and principal investigators must be based at an eligible UK research organisation.

We strongly encourage international co-investigators from countries not on the DAC list to make a significant contribution to their own research costs. Please see [Costings Guidance for Non-UK Institutions and Partners](#) for more information on non-UK non-DAC list organisation costs. If a co-investigator is from a country flagged as likely to graduate from the DAC list during the course of the project this should be treated as a country NOT on the DAC list.

It is recommended that potential overseas-based co-investigators should contact the Je-S Helpdesk (jeshelp@rcuk.ac.uk) if their organisation is not selectable as part of the Je-S person account registration process. These organisations will then be added to the Je-S database which will allow relevant selection as part of the required person account registration process (that co-applicants are obliged to initiate, via the login page). Please ensure you initiate such discussions as soon as possible before the call closing date.

All costs must be specifically justified, and applicants must explain why such costs are required to achieve the aims of the project. Applicants must also state clearly in the 'Justification for Resources' attachment of the Je-S form which costs in the proposal relate to international research organisations. Please note that international co-investigator salary

costs should only be claimed where clear justification is provided as to why this cost cannot be met by the international research organisation.

Objectives

List the objectives of your research in order of priority. *(4000 character limit)*

Summary

Provide a plain English summary of the activities you propose to carry out in a language that could be publicised to a general, non-academic audience. Please note that this section will be made available on the Gateway to Research database, therefore applicants should ensure confidential information is not included in this section.

This section should clearly capture how the context, aims and objectives, and potential application and benefits of the activities are directly and primarily relevant to the problems of developing countries. *(4000 character limit)*

Academic beneficiaries

Please summarise how your proposed research will contribute to knowledge, both within the UK and globally. This should include how the activities/research will benefit other researchers in the field and identify whether there are any academic beneficiaries in other disciplines and, if so, how they will benefit and what will be done to ensure that they benefit.

Please list any academic beneficiaries from the research and give details of how they will benefit and how the results of the proposed research will be disseminated. Also describe the relevance of the activities/research to beneficiaries. *(4000 character limit)*

Please note that this section may be published to demonstrate the impact of research council-funded research. Please ensure confidential information is not included in this section.

For further detailed guidance please access the help text page linked to this Je-S section.

Staff duties

Summarise the duties of the staff members that will be involved in your project, including the applicants. Ensure that it is clear why it is necessary for this person to perform this role at the resource level you have requested. *(2000 character limit)*

Impact summary

Applicants are required to consider carefully how best to build links and contacts at the concept and development stage of the proposal with the potential beneficiaries and users to be involved within the grant and to work towards co-production of knowledge with research users where appropriate. It is vital that the economic and societal impact of all projects funded by ESRC is maximised. For calls within the UKRI GCRF Collective Programme, the primary focus should be on impact that benefits the welfare and societal and economic development of a developing country or countries.

For this call it is recommended that each project holds a seminar or workshop with key stakeholders in the country or countries where the majority of the research is taking place,

to set out the aims of the project and fully ground it in the local context. Applicants should include brief details of their planned stakeholder workshop in the Impact Summary. Further details must be provided in the Pathways to Impact attachment (see below).

Please address the following three questions (*4000 character limit*):

- **Who will benefit from this research?** List any beneficiaries from the research, for example those who are likely to be interested in or to benefit from the proposed research - both directly or indirectly. Beneficiaries must consist of a wider group than that of the investigators' immediate professional circle carrying out similar research.
- **How will they benefit from this research?** Describe the relevance of the research to these beneficiaries, identifying the potential for impacts arising from the proposed work.
- **What will be done to ensure that they have the opportunity to benefit from this activity?** Describe how you will communicate and engage with these stakeholder groups/different audiences to ensure that they have the opportunity to benefit from the research.

Please note that this section may be published to demonstrate the potential impact of UKRI funded research. Please ensure confidential information is not included in this section.

For further detailed guidance please access the help text page linked to this Je-S section.

Ethical information

This section must be comprehensively addressed. (*4000 character limit*)

Applicants must ensure the proposed activities will be carried out to a high ethical standard and must clearly state how any potential ethical and health and safety issues have been considered and will be addressed ensuring that all necessary ethical approval is in place before the project commences and all risks are minimised.

The ESRC's [Framework for Research Ethics](#) contains a full explanation of our approach, with guidance for applicants.

Other support

Enter details of any support sought or received from any other source for this or other research in the same field in the past three years. Complete all fields for support either received or pending a decision. Contributions from project partners should not be entered here - they should be detailed in the project partners section.

Related/previous proposals

Please state whether your application under this call is related to any proposals previously submitted to us. You must detail the appropriate related proposal and its relationship here. Select 'Related Proposals', then 'Add New Related Proposal Item' before entering the details of any related proposals. (Please note the ESRC [policy on resubmissions](#))

Please enter the reference numbers of any support sought or received from us in the past five years via the 'Previous proposals' section. Please note that this only relates to previous ESRC research grants.

Staff

If your project requires staff other than the team of investigators, their details should be entered here. 'Directly Allocated staff' are those who will be working directly on the project, but whose involvement on the grant can only be based on an estimate of the time the work will take (eg investigators). 'Directly Incurred staff' are those whose time on the project is actual, auditable and verifiable (eg researchers and technicians).

Associated studentships will not be funded through this call.

Resources

The Gender and Intersectionality theme of this call will provide up to **48 months** of funding, and the Education as a Driver of Sustainable Development theme will provide up to **36 months** of funding, each with an overall limit of **£4.75 million** (UKRI contribution) per grant. If successful, UKRI will contribute 80% of the fEC for UK costs with the host institution supporting the remaining 20%.

For international co-investigators the programme will support in full (100%) the directly incurred costs and, in the case of developing countries, contribute to indirect costs. Please refer to the document '[Costings guidance for non-UK institutions and partners](#)' for full guidance on this. Please note that all costs directly incurred by non-UK organisations should be entered under 'Other Directly Incurred' costs and should be marked as 'Exceptions', using the tick box.

All resources requested must be fully justified in the 'Justification of Resources' attachment (see below). All costs must be specifically and clearly justified, and applicants must explain why such costs are required to achieve the aims of the research project. Applicants must also identify clearly on the Je-S proposal and in the 'Justification for Resources' attachment any costs in the proposal which are directly incurred by non-UK organisations.

All costs must be entered at prices at the time of submission and inflation must **not** be included. Successful grants will have an allowance for inflation, calculated using standard indices.

The following sections provide guidance on how to enter different types of resource within the Je-S proposal, and any supporting documentation that may be required.

T&S - add each item of Travel and Subsistence required for your project. You should indicate the calculations upon which this figure is based in the 'Destination and Purpose' box.

Equipment – requests for large items of equipment are not eligible under this call.

Social surveys - Social survey costs which are being sub-contracted should be included under this section and are eligible for fEC exception funding at 100% (for the amount sought

from the council). See 'other directly incurred costs' section if surveys are to be done using in-house resources.

Other directly incurred costs - including justified; project specific consumables, consultancy fees, equipment costing less than £10,000, recruitment and advertising costs.

Costs for social survey work proposed to be done using in-house resources should also be included under this section and will be funded at the standard 80% fEC funding rate. Proposals including such costs will need to fully justify why the work should not be subject to external competition, and provide benchmarking or other data to support a case that best value for money is being achieved through using research organisation staff rather than external contractors.

All project costs relating to UK business or civil society co-investigators must be prefixed as 'UK Co-I's business or civil society costs'. The co-investigator salary costs must be entered under 'Other Directly Incurred Costs' as should all other claimed staff salaries and related costs associated with the UK co-investigator's business or civil society body, and should be marked as an 'Exception' using the tick box.

All costs relating to UK business and/or civil society co-investigators must be specifically justified, and applicants must explain why such costs are required to achieve the aims of the research project. Applicants must also state clearly in the 'Justification for Resources' attachment of the Je-S form which costs in the application relate to UK business or civil society organisations. Please note UK business and civil society co-investigator salary costs should only be claimed where clear justification is provided as to why this cost cannot be met by the UK business or civil society organisation.

International co-investigators

All costs associated with international co-investigators, whether salary, fieldwork, equipment or travel and subsistence should be entered as 'Other Directly Incurred Costs' and should be marked as an 'Exception' using the tick box. To enable UKRI to meet transparency and external audit requirements all overseas costs must be entered into this section using the format 'Organisation: Country: Cost Category: Cost Description'.

For example:

- University of Nairobi: Kenya: Staff: 1 x PDRA
- University of Nairobi: Kenya: Travel and Subsistence: 4 x flights
- University of Nairobi: Kenya: Other Directly Incurred Costs: 5 x Workshops including catering and accommodation

Any overhead/indirect costs associated with developing (i.e. on the DAC list) country co-investigators should be entered under 'Other Directly Incurred Costs' and can be **up to 20%** of salaries and other staff-related costs (i.e. statutory contributions analogous to UK National Insurance or Superannuation contributions). Overhead/indirect costs may not be charged on non-staff related direct costs, eg equipment, consultancies, conferences and T&S. The overhead/indirect cost must be entered as a separate cost line and should be marked as an 'Exception' using the tick box. Indirect costs must be clearly prefixed with 'Overseas - developing country indirect cost'. Please note that overhead/indirect costs cannot be claimed for co-investigators from developed (i.e. not on the DAC list) countries or those likely to graduate from the DAC list during the course of the project.

Other directly allocated costs - including support staff salaries, a share of the costs of departmental support staff and the costs of access to major research facilities.

Estates and indirect costs

Estate and indirect costs are specific to each research organisation, and do not require justification in your case for support.

Research organisations that have implemented the TRAC costing methodology and have passed the Quality Assurance process should apply their own estate and indirect costs. Non-research organisations that are not required to implement TRAC must have a robust costing methodology in place that has been validated in order to apply their own estates and indirect cost rates. The standard default rates should be used where research organisations have not yet developed their own rates.

Your Research Office will be able to assist with this section.

Project partners

If you have secured a commitment from another organisation or funding body to provide additional resources for this project, the details of that support should be entered here. A letter of support from each partner organisation confirming the level of support specific to this proposal must be included as an attachment via this section.

Beneficiary countries

As a requirement which is integral to the UKRI GCRF Collective Programme, your research should address challenges faced by developing countries or territories, please select all those that apply from the list of beneficiary countries. Please only select countries where you expect your research to have real or direct benefit.

Timetable

Provide a clear timetable for the project and the intended progress of the project through the different stages. Your planned timetable can be expanded upon if necessary within your case for support.

Data collection

Applicants must adhere to ESRC policy. Please refer to the full statement on data management planning and datasets deposition requirements for data intensive investments in the [ESRC Research Data Policy](#) and the [Research Funding Guide](#). Explain clearly how you will meet these requirements if relevant to your proposal. Complement but do not duplicate the information provided in the Data Management Plan as explained below.

User involvement

If 'Users' have been/will be engaged with your research project, please specify the nature of their engagement. 'Users' are individuals, groups or organisations who have an interest in or may benefit from the research. Users may be from the public sector, private sector, civil society or the wider public. Engaging users in your project from its conception and development through to the dissemination stage is likely to increase the impact achieved.

Applicants should expand upon how the proposed work will be managed to engage users and beneficiaries in the Pathways to Impact attachment.

Attachments

It is important that applicants **only submit the supporting attachments specified in this document**. We reserve the right to reject applications that do not include the required attachments or include attachments not specified in this guidance. It is recommended that attachments are uploaded in PDF (rather than Word) format, to ensure unsupported font type issues do not cause problems with maximum length requirements, please see [Je-S guidance](#).

The following are mandatory attachments for this call:

- Case for support
- Justification of resources
- Pathways to Impact
- Data Management Plan
- CVs
- ODA compliance statement
- International co-investigator letter of support

List of Publications, Letter of Support, Proposal Cover Letter, Facility form, Final/Interim Report and 'Other' are optional attachments and should be included where appropriate.

Important note: If you are unclear about whether you can include a specific attachment please contact gcrfnetworkplus@esrc.ukri.org for advice, as unrequested attachments can hinder the processing of your application. The research councils reserve the right to return or reject proposals that include attachments not permitted on this call.

Case for support (*maximum of twelve sides of A4*)

This is the body of your network plus proposal. It must not exceed 12 sides of A4 and must include the following sections:

- The introduction should set the strategy, vision, aims and objectives of the network plus. It should briefly sketch the main work on which the research and activities will draw, with references. Any relevant, scientific, policy or practical background should be included.
- The detailed research questions to be addressed should be clearly stated including an articulation of how the application addresses the research agenda of theme you are applying to (Gender or Education) and the needs of the country(ies) of geographical focus.
- Give a full and detailed description of the proposed core network activities and an indication of the proposed 'plus' funded activities, including how they will be competitive and open to those outside of the network membership. Outline the timelines, governance and assessment criteria for distributing the 'plus' funds.
- The network plus should convene an inclusive advisory committee to support and advise the leadership throughout their project, with consideration to equality and diversity issues. Details of how the advisory committee will be convened should be provided here.

- Where any new research is to be undertaken clearly state the framework and methods for analysis, and explain the reasons for their choice. Particular care should be taken to explain any innovation in the methodology or where you intend to develop new methods.
- Indicate the expected outputs both academic and those orientated to (potential) users (articles, papers, datasets, events, etc.). Where possible, describe the expected impact.
- The bibliography for references cited in the proposal should be attached under the 'list of publications' document; this should not include publications not cited in the proposal. A list of the most relevant and recent publications should be included in the applicant CVs.

Justification of resources (*maximum of three sides of A4*)

This is a 3-side A4 statement justifying that the resources requested are appropriate to undertake the project. The justification of resources should explain why the resources requested are appropriate for the activities proposed, taking into account the nature and complexity of the proposal. It should not be simply a list of the resources required, as this is already given in the Je-S form. Where you do not provide explanation for an item that requires justification, it will be cut from any grant made.

Justification of costs incurred by non-UK organisations must be clearly identified within this document in line with the Resource summary section.

Please refer to the [Je-S handbook](#) for further guidance.

Pathways to Impact (*maximum of two sides of A4*)

While the Impact Summary section of the Je-S form is for applicants to explain who will benefit from the research and how, the Pathways to Impact attachment should be used to explain what will be undertaken by the applicant to ensure that opportunities for users to benefit from your research, and thus for achieving economic and societal impact, are maximised. It is important that the detail in this document is realistic and appropriate to the particular developing country or countries for which the research is intended to benefit.

The Pathways to Impact is your opportunity to describe how the potential impacts of your research will be realised. This attachment is specific to users and beneficiaries of the research who are outside of the academic research community.

User communities may include bodies and individuals from industry, charities, universities, local authorities and other public bodies, government departments and independent policy bodies.

Potential academic beneficiaries of your work and pathways towards achieving academic impact should not be detailed in this attachment but in the 'Academic Beneficiaries' section of the Je-S form and the 'Case for Support' as appropriate.

In describing plans to maximise impact, applicants should consider what is achievable and expected for a project of this nature. If you do not feel that your research has potential to achieve impact outside of academia, you should use the Pathways to Impact attachment to

explain why this is the case. However, it is expected that applicants will have considered impact in its broadest economic and societal terms before coming to this conclusion. Applicants should note that while we recognise the value of this type of research, reviewers may comment on the applicant's reasoning during consideration of the proposal. Impact can take many forms, be manifest at different stages in the research process, and be promoted in different ways. It may be helpful to consider impact in respect of the short term (during the currency of the grant), medium term (up to one year afterwards), and the long term. A statement about [our expectations of the research we fund](#) provides further, useful information.

Please detail how the proposed research project will be managed to engage users and beneficiaries and increase the likelihood of impacts.

For further detailed guidance please access the relevant Je-S help text page.

Data Management Plan (*maximum of three sides of A4*)

It is a requirement of the [ESRC Research Data Policy](#) that all applicants planning to generate data as part of their grant must include a Data Management Plan. The Data Management Plan should be used as an opportunity to describe how the data, i.e. primary input into research and first-order results of that research, are going to be managed - starting from planning for research and through the life-cycle of the grant until data is accepted for archiving by the UK Data Service.

The ESRC recognises the importance of research data quality and provenance. Research data generated by UKRI funded research must be well-managed by the grant holder during the grant period to enable their data to be exploited to the maximum potential for further research. For further guidance see the Je-S Help text.

CV (*maximum of two sides of A4 per person*)

A CV for each applicant and named research staff member must be included. This should include contact details, qualifications (including class and subject), academic and professional posts held since graduation, a list of the most relevant and recent publications, and a record of research funded by UKRI and other bodies. This should not exceed two A4 sides.

List of publications

The bibliography for references cited in the proposal only should be attached. Please note publications not cited in the proposal should not be added here. A list of the most relevant and recent publications by the applicant should be included in the applicant CV.

Final/interim reports (*maximum of three sides of A4*)

All current grant holders must submit a progress report on their current research council awards with any new application, whether they are applying as a PI or a Co-I. Details should include the output records submitted by the applicant to the Researchfish system.

Proposal cover letter/letter of support (*maximum of one side of A4*)

Letters of support can be submitted as part of a proposal; provided they are essential to the successful conduct of the research (eg confirming access to datasets, or confirming access to or use of the facilities provided by named organisations). General letters of support that are

not essential for the successful conduct of the research or do not confirm any specific contribution to the project should not be included.

International co-investigator letter of support (maximum of 3 sides of A4)

In order to qualify as an international co-investigator on a GCRF application our rules state that any academic researcher (i.e. those holding a PhD or equivalent qualification, or higher) from an established international research organisation of comparable standing to a UKRI-recognised UK research organisation will be eligible. In order to help the research councils judge whether an international research organisation is of equivalent standing to a UK research organisation and to establish the international co-investigator(s) and their research organisations' ability to undertake the project as well as their commitment to the project, we ask international research organisations to submit a mandatory letter of support if their project includes one or more international co-investigators.

Please use the template at Annex I to complete the international co-investigator letter of support.

Any letters of support should be attached to your proposal as **'Other'** type attachment.

Other attachments

ODA compliance statement (maximum of one side of A4)

Funding within this call will be awarded in a manner consistent with [ODA guidelines](#). To comply with ODA requirements, all proposals must make clear how their primary purpose is to promote the economic development and welfare of a developing country or countries on the DAC list. There are no priority countries. Proposals may relate to any country or countries on the DAC list except those which are flagged as likely to graduate from the list during the course of the proposed project. If a country is flagged as likely to graduate it should not be the primary focus of a proposal, although it can be included as an additional case study or comparison. In such proposals the primary purpose of the research should be to promote the development and welfare of a developing country not due to graduate from the list.

Applicants must clearly demonstrate how they meet ODA requirements throughout their 'Case for support' and 'Pathways to impact'. Each proposal must also include a mandatory attachment which explicitly demonstrates how it meets key ODA requirements. **The 'ODA compliance statement' must answer the following three questions in order:**

1. Which country / countries on the DAC list will directly benefit from this proposal?
2. How is your proposal directly and primarily relevant to the development challenges of these countries?
3. How do you expect that the outcome of your proposed activities will promote the economic development and welfare of a country or countries on the DAC list?

UKRI reserves the right to reject applications that do not respond to all three questions. The one page 'ODA Compliance Statement' must be attached to your proposal as a **'Non-UK Components'** type attachment.

Further general advice for applicants on how to meet [ODA requirements](#) is provided by the ESRC and in the [Frequently Asked Questions](#). Any queries about the ODA eligibility of projects should be raised with the ESRC contact named in the call specification document before submitting a proposal.

Proposal classifications

The information provided in this section will be used by us to identify appropriate peer reviewers. It would therefore assist us greatly if you could populate the Research Area/Qualifiers/Keyword sections to provide a comprehensive description of your area of expertise.

The Proposal classification area is a harmonised (and expanded) structure agreed with other UKRI councils. Therefore, if your area of expertise crosses the remits of more than one UKRI council you will now only need to provide the information once.

For this call it is an essential requirement to add the names of the country/countries involved in the research as a free-text keyword as well as the acronym 'GCRF'.

Submit your proposal

After all mandatory sections have been completed, the submit button will appear across the top menu bar. Please ensure that you have **completed all attachments** that are not standard mandatory attachments for Je-S but are a **mandatory requirement to be completed for this specific call**. The submit button will route your finalised proposal to the authorising facility within your organisation (as explained in the Registration section above).

Please note that the proposal must be formally submitted by your organisation before **16:00 UK time on 11 April 2019**.

Commissioning timetable

- Call for proposals issued – 15 January 2019
- Deadline for submitting proposals – **16:00 on 11 April 2019**
- Commissioning panel meeting – Early September 2019
- Decisions to applicants – Late September 2019
- Start date for successful proposals – 1 November 2019

Tracking your proposal

There are additional document maintenance actions that can be undertaken via the Document actions button. For example, the 'Show submission path' will indicate to you where in the organisation submission chain the proposal currently is located (and who holds current responsibility) – eg owner, approval pool, submitter pool or submitted to council.

Further enquiries

Enquiries relating to UKRI funding rules and proposal procedures should be addressed to: gcrfnetworkplus@esrc.ukri.org

Enquiries relating to technical aspects of the Je-S form should be addressed to:

- J-eS helpdesk
Email: jeshelp@rcuk.ac.uk
Telephone: +44 017943 44164

The helpdesk is open Monday-Thursday 08:30-17:00, Friday 08:30-16:30 (excluding bank holidays and other holidays). If calling out of hours, please leave a voice message.

Annex I: Template for International Co-I letter of support (maximum of three sides of A4)

International co-investigator (Co-I) research organisation eligibility

1. Briefly outline the main objectives of your organisation's research strategy

2. Please outline the research capacity of your organisation

For example, you may wish to comment on the following aspects:

- Number of researchers employed by the organisation
- Research projects in the last five years led or co-led by staff while employed at your organisation (eg size and complexity of the projects, their management and coordination and the number of postdoctoral researchers and/or research students supervised)
- Publication record of researchers at your organisation
- Ways in which your organisation has sought to maximise the wider impact and value of its research.

3. Please provide details of your organisation's ethical assurance procedures

For reference, please see the [ESRC's Framework for Research Ethics](#).

International Co-I eligibility

1. Please provide details of the international Co-I's commitment to the proposed project

You should address the following aspects:

- The added value which the international Co-I brings to the project
- How the international Co-I's institution will support them during the lifetime of the project.

2. If you have requested any costs for the salary of the international Co-I, please confirm that these are not available from your organisation

The response to each question must be clearly labelled with the relevant section and question numbers, i.e. please preserve the template format. No word limits are set for

responses to individual questions, but the International Co-I letter of support as a whole must not exceed three sides of A4. In addition, please note the Letter of Support must be submitted on institutional **headed paper** and **signed** and **dated** by the Head of Department (or equivalent).

Distinct Letters of Support must be submitted by the Head of Department (or equivalent) of each international Co-Investigator on the proposal.

ESRC reserves the right to reject applications which do not address all the questions in the template if international Co-Investigator(s) are present in the application.
