Introduction

This invitation-only call is open to applicants who have been invited to submit a full proposal under the ESRC-NIHR Dementia Research Initiative 2018 call. All uninvited or ineligible applications will be rejected.

This is a guidance document created to assist applicants to this call in the completion of their proposal. It is specific to this call and should be used in conjunction with the following information:

- **ESRC Research Funding Guide**
<https://esrc.ukri.org/funding/guidance-for-applicants/research-funding-guide/>
- **ESRC Postgraduate Funding Guide**
<https://esrc.ukri.org/files/skills-and-careers/studentships/postgraduate-funding-guide/>
- **ESRC guidance on ‘How to write a good research grant proposal’**
<https://esrc.ukri.org/funding/guidance-for-applicants/how-to-write-a-good-research-grant-proposal/>
- **Je-S help text** is available in every page of your Je-S form, simply click on the question mark against any section (or on the word ‘Help’ in the top right hand corner of each page)
- **Je-S helpdesk** (for all Je-S system enquiries)
ieshelp@rcuk.ac.uk or 01793 444164

If you experience difficulties using Je-S or have questions regarding its use, helpdesk staff can be contacted Monday to Friday 9.00-17.00 UK time (excluding bank holidays and other holidays). Out of hours: please leave a voice message.

When reporting problems by email or telephone, please give your name, organisation and user id, the date and time, what part of the form or system you were working on, and the nature of the problem.

- **Scheme-specific guidance**
<https://esrc.ukri.org/funding/funding-opportunities/esrc-nihr-dementia-research-initiative-2018/>

For further information contact:

- Cora Jaitner
Email: dementia@esrc.ukri.org
Telephone: 01793 41 3101
- Sarah Lobo
Email: dementia@esrc.ukri.org
Telephone: 01793 41 3036

Important: Where information and guidance issued in this document differs from the general guidance offered in these sources; you should adhere to the guidance in this document.

Joint Electronic Submissions (Je-S)

All proposals under this call must be completed and submitted through the UKRI's Joint Electronic Submissions (Je-S). To be able to do this the organisation must be registered (or self-registered for certain calls) for Je-S, and the applicants must hold Je-S accounts.

Organisations from which proposals can be submitted:

- UK higher education institutions and some other independent UK research organisations are already **recognised institutions** on Je-S (including any recognised Independent Research Organisation). A list of these organisations is available from the Je-S login page. The organisation will have set up the Je-S submission process and will therefore be available within the Je-S searches.
- The list of independent research organisations eligible to submit proposals is available at: <https://www.ukri.org/funding/how-to-apply/eligibility/>. To note, this includes all NHS Trusts, Hospitals, Boards, Primary Care Trusts and GP Practices.

Je-S accounts for applicants

All principal and co-investigators must have a Je-S account which has been verified by a third party before they can be found in searches within the Je-S System and added as an applicant. To get you started on creating an account please refer to the Je-S helptext at <https://je-s.rcuk.ac.uk/Handbook/pages/SettingupJeSaccount/SettingupJeSaccount.htm>

Please ensure that applicants select the 'Account Type: Research Proposal' and the option 'An Applicant on a Standard or Outline Proposal' - see helptext <https://je-s.rcuk.ac.uk/Handbook/pages/SettingupJeSaccount/SettingupJeSaccount.htm>

It is recommended that applicants forward their proposal to the organisation submitter pool in good time before the call deadline to allow a sufficient period for the approval and final submission process. The proposal must be submitted through the Je-S System to ESRC by the institution's nominated contacts. Once the applicant completes and submits the proposal, notification is then sent to their organisation's 'submitter' to action. The 'submitter' is the person in that organisation authorised to approve the proposal and do the final stage of submission.

The applicant will receive an email confirming that the proposal has been submitted to the Submitter Pool - this means the proposal is still with the organisation but is **not** yet submitted to the research council. The final submission process is the responsibility of the host institution, and we cannot accept responsibility for any delay which may occur at this stage. We strongly advise applicants to check that they receive an email confirmation from the Je-S System confirming that the proposal has been submitted to the research council.

Before creating your proposal

Research proposals may **only** be made on UKRI's Joint Electronic Submission (Je-S) forms.

Please note that **the deadline for research organisation submission of proposals is 16:00 on 18 July 2018**. You should **allow sufficient time for completion of the research organisation submission process checks/authorisation**. You can view all Je-S registered organisations via the Je-S login page, to ascertain whether the proposed submitting organisation is registered.

Your proposal will actually be sent to Je-S/ESRC from the submitter pool at your research organisation. There is a **further layer of administration between your submission of the proposal and the proposal being submitted to the ESRC, via Je-S**. The research organisation's submission route usually includes both an approver (ie head of department) and submitter pool (ie central finance office), and the ESRC cannot accept responsibility for any delay which may occur as a consequence. We strongly advise applicants to secure confirmation from their relevant administrator that the proposal has been successfully submitted to the Je-S team (see also 'Tracking your proposal').

Creating your proposal

Log in to Je-S at <https://je-s.rcuk.ac.uk/JeS2WebLoginSite/Login.aspx>.

Documents screen: Select 'New Document'.

Add new document screen: Select 'Call search' (highlighted at top of screen). When prompted, type in the call title (**ESRC/NIHR Dementia Full (Invite Only) 2018**) and select from the list created. The remaining three selection fields will be automatically populated.

Select the 'Create Document' button.

It is the **applicant's responsibility to ensure that the proposal is created and submitted against the correct call** (and consequently correct scheme). We will **not accept** proposals for processing that are not submitted using the above call route.

Completing your proposal

The initial Je-S document instructions page will give you general guidance on the navigation layout, specifically icon descriptions.

The left hand column 'Document Menu' lists all the sections associated with this call and clearly identifies which ones are mandatory (red cross, turning to green tick when completed).

The details below are not an exhaustive step-by-step guidance, and we recommend that you refer to the Je-S helptext for additional information.

Please note you may return to edit saved documents at any time.

Project details

- Select organisation and department from drop down lists
- ‘Your Reference’ should be supplied by your research organisation (consult your Research Office). If your administration office does not have a system for referencing grant proposals, a suitable reference of your own choice will be acceptable.
- Enter ‘Project Title’ (maximum limit of 150 characters)
- For ‘Proposal Call’, select **ESRC/NIHR Dementia Full (Invite Only) 2018**. Please note that the option will only be available once the call is live.
- This call has a fixed start date. The usual three month start period rules do not apply to this project. Your start date must be **1 January 2019**.
- Your grant should be a proposed duration of between **36 and 60 months**.
- Submission route – It is recommended that once this initial section is completed, check the submission path (via Document Actions tab) to see if the proposal has to be signed off by submitters and approvers, in which case please make sure they will be available to process the document on the day you intend to submit it to Council.

Investigators

Enter the name of the principal investigator (PI) and any co-investigators (Co-I) if applicable.

Investigators may be from more than one research organisation, but the PI must be from the organisation that will administer the grant. The PI will take intellectual leadership of the project and manage the research; this individual will be the contact person for ESRC correspondence. All named investigators are responsible for ensuring that successful proposals are undertaken and completed in the manner specified.

Please note that it is mandatory that you answer positively to the question ‘Post will outlast project?’ To clarify, there is an expectation that the PI’s post will be in place for the duration of the project.

UK co-investigators in business, civil society or government bodies

Please note that any researcher from an established business, civil society or government body based in the UK or relevant members of the public will be eligible to be listed as a **co-investigator** under **ESRC/NIHR Dementia Full (Invite Only) 2018**. The ESRC will fund 100% of justified costs, however, the project costs associated with these types of co-investigator contributions combined with the costs for International co-investigators must not exceed 30% of the overall cost of the grant (at 100% fEC). Please note that costs cannot be claimed from government bodies. Please see guidance below on how to record these costs in the proposal form.

Members of the public and people affected by dementia may be listed as co-investigators where they have a relevant understanding of dementia and contribution to make to the research project. Applicants will need to describe their approach and budget for patient and public involvement in an attachment to their proposal. All co-investigators must hold a Je-S account.

On receipt of the proposal, eligibility of business, civil society or government body will not normally need to be checked if it is reasonably clear that they are appropriate to conduct the work. Where there is doubt, checks will be carried out should a positive funding decision be taken.

It is recommended that potential UK co-investigators from business, civil society or government bodies contact the Je-S Helpdesk (jeshelp@rcuk.ac.uk) at an early stage if their organisation is not selectable as part of the Je-S person account registration process. These organisations will then be added to the Je-S database, which will allow relevant selection as part of the required person account registration process (that co-applicants are obliged to initiate, via the login page).

All project costs relating to UK business, civil society or patient and public involvement co-investigators must be prefixed as 'UK Co-I's business or civil society costs' and must be entered into the costs section on Je-S as follows:

Co-investigator 'time' allocation must be entered under the standard Co-I section, but the salary rate must be entered as zero. The co-investigator salary costs must then be entered under 'Other Directly Incurred Costs' (please tick the 'Is Exception' box to ensure 100% costs claimed), as should all other claimed staff salaries and related costs associated with the UK Co-I's business or civil society body.

All costs must be specifically justified, and applicants must explain why such costs are required to achieve the aims of the research project. Applicants must also state clearly in the 'Justification for Resources' attachment of the Je-S form which costs in the proposal relate to the UK co-investigator's business, civil society or government body. Please note that UK co-investigator's business or civil society salary costs should only be claimed where clear justification is provided as to why this cost cannot be met by the UK co-investigator's business or civil society organisation.

Host/submitting institutions are reminded that for calls that encourage non-academic co-investigators, a suitable support structure should be in place to assist such individuals in registering for Je-S accounts and contributing to the research case.

International co-investigators

Please note that any academic researcher (PhD or equivalent) from an established international research organisation of comparable standing to an ESRC-eligible UK research organisation will be eligible to be listed as an international co-investigator under this call. The Research Council will consider funding the direct costs of international co-investigators at 100% full economic cost (fEC); however, the total of these costs and the costs for UK co-investigators in business, civil society or government bodies must not exceed 30% of the full 100% fEC cost of the grant.

Potential overseas-based co-investigators should contact the Je-S Helpdesk (jeshelp@rcuk.ac.uk) if their organisation is not selectable as part of the Je-S person account registration process. These organisations will then be added to the Je-S database which will allow relevant selection as part of the required person account registration process (that co-applicants are obliged to initiate, via the login page). Please ensure you initiate such discussions as soon as possible before the call closing date.

All costs associated with the international co-investigator - whether salary, fieldwork, equipment or travel and subsistence - should be entered as 'Other Directly Incurred' and should be marked as an 'Exception' using the tick box. All costs should also be prefixed with 'Overseas:'.

Co-investigator 'time' allocation must be entered under the standard Co-I section, but the salary rate must be entered as zero.

All costs must be specifically justified, and applicants must explain why such costs are required to achieve the aims of the research project. Applicants must also state clearly in the 'Justification for Resources' attachment of the Je-S form which costs in the proposal relate to international research organisations. Please note that international co-investigator salary costs should only be claimed where clear justification is provided as to why this cost cannot be met by the international research organisation.

Objectives

List the objectives of your research in order of priority. *(4000 character limit)*

Summary

Provide a plain English summary of the research you propose to carry out in a language that could be publicised to a general, non-academic audience. The summary should be clearly laid out and readable by the potential users and beneficiaries of your research. Please note that this section will be made available on the Gateway to Research database, therefore applicants should ensure confidential information is not included in this section. *(4000 character limit)*

Academic beneficiaries

Please summarise how your proposed research will contribute to knowledge, both within the UK and globally. This should include how the research will benefit other researchers in the field and identify whether there are any academic beneficiaries in other disciplines and, if so, how they will benefit and what will be done to ensure that they benefit.

Please list any academic beneficiaries from the research and give details of how they will benefit and how the results of the proposed research will be disseminated. Also describe the relevance of the research to beneficiaries. *(4000 character limit)*

Please note that this section may be published to demonstrate the impact of research council-funded research. Please ensure confidential information is not included in this section.

For further detailed guidance please access the helptext page linked to this Je-S section.

Staff duties

Summarise the duties of the staff members that will be involved in your project, including the applicants. Ensure that it is clear why it is necessary for this person to perform this role at the resource level you have requested. *(2000 character limit)*

Impact summary

Applicants are required to consider carefully how best to build links and contacts at the concept and development stage of the proposal with the potential beneficiaries and users to

be involved within the grant and to work towards co-production of knowledge with research users where appropriate. It is vital that the economic and societal impact of all projects funded by ESRC is maximised.

Please address the following three questions (*4000 character limit*):

- **Who will benefit from this research?** List any beneficiaries from the research, for example those who are likely to be interested in or to benefit from the proposed research - both directly or indirectly. Beneficiaries must consist of a wider group than that of the investigators' immediate professional circle carrying out similar research.
- **How will they benefit from this research?** Describe the relevance of the research to these beneficiaries, identifying the potential for impacts arising from the proposed work.
- **What will be done to ensure that they have the opportunity to benefit from this activity?** Describe how you will communicate and engage with these stakeholder groups/different audiences to ensure that they have the opportunity to benefit from the research.

Please note that this section may be published to demonstrate the potential impact of UKRI council-funded research. Please ensure confidential information is not included in this section.

For further detailed guidance please access the helptext page linked to this Je-S section.

Ethical information

This section must be comprehensively addressed. (*4000 character limit*)

Applicants must ensure the proposed research will be carried out to a high ethical standard and must clearly state how any potential ethical and health and safety issues have been considered and will be addressed ensuring that all necessary ethical approval is in place before the project commences and all risks are minimised.

The ESRC's Framework for Research Ethics (<https://esrc.ukri.org/funding/guidance-for-applicants/research-ethics/>) contains a full explanation of our approach, with guidance for applicants.

Other support

Enter details of any support sought or received from any other source for this or other research in the same field in the past three years. Complete all fields for support either received or pending a decision. Contributions from project partners should not be entered here - they should be detailed in the project partners section.

Related/previous proposals

Please state whether your application under this call is related to any proposals previously submitted to us. Please note the policy on 'invite only' resubmissions at <https://esrc.ukri.org/funding/guidance-for-applicants/resubmissions-policy/> on the ESRC website. You must detail the appropriate related proposal and its relationship here. Select

'Related Proposals', then 'Add New Related Proposal Item' before entering the details of any related proposals.

Please enter the reference numbers of any support sought or received from us in the past five years via the 'Previous proposals' section. Please note that this only relates to previous ESRC research grants.

Staff

If your project requires staff other than the team of investigators, their details should be entered here. 'Directly Allocated staff' are those who will be working directly on the project, but whose involvement on the grant can only be based on an estimate of the time the work will take (for example, investigators). 'Directly Incurred staff' are those whose time on the project is actual, auditable and verifiable (for example, researchers and technicians).

Associated (project) studentship details can also be entered if permitted within the call specification, however please note that only proposals with a proposed duration of three years or more would be eligible. The student's primary supervisor must be the Principal or one of the co-investigators on the grant and must be approved to act as primary supervisors for PhD students must be based within an accredited Doctoral Training Partnership (DTP) or Centre for Doctoral Training (CDT); and the student(s) must be located in the same DTP or CDT and be studying on an accredited pathway.

Associated studentships are designed to add value to the proposed research outlined in the proposal, whilst providing a clear opportunity for a distinct and independent course of enquiry for the student. The studentship should not be treated as a displacement for the normal research support required on the grant. Please note that it is a mandatory requirement that a separate case for each associated studentship for which ESRC funds will be used be submitted with the proposal as attachment type '**Project Student Request**' along with letter(s) of Support from the Director(s) of the relevant DTP(s) or CDT(s).

Please refer to the Je-S Helptext and the ESRC postgraduate funding guide for guidance on how to include costs for associated studentships.

Resources

All resources requested must be fully justified in the 'Justification of Resources' attachment. The **ESRC/NIHR Dementia Full (Invite Only) 2018** will provide up to 60 months funding with an overall limit of £5 million (100% full economic cost) per grant. If successful, ESRC will meet 80% of the full economic costs on proposals submitted and the host institution is expected to support the remaining 20%.

Costs should be broadly consistent with those submitted at the outline stage. We expect that the costs in the full proposal will not differ from the outline costs by more than 10%. The total cost must not exceed upper financial limit of the call: £5 million (at 100% full economic cost).

T&S - add each item of Travel and Subsistence required for your project. You should indicate the calculations upon which this figure is based in the 'Destination and Purpose' box.

Equipment - enter any items of equipment costing £10,000 or more (including VAT) in this section. The **actual level of funding sought from the ESRC** should also be entered in this section.

For items of equipment costing between £10,000 and UKRI equipment purchase threshold value (£115,000 excluding VAT), the research organisation will need to provide extra justification for these items in the 'Justification of Resources' attachment, providing evidence of an evaluation of the use of existing relevant capital assets. They will be expected to make a contribution towards the cost of the equipment in the order of 50% of the cost.

All requests for items of equipment costing above the UKRI equipment purchase threshold (£115,000) should be accompanied by a two-page business case (to be included as an attachment within the equipment screen and not the attachments section) outlining the strategic need for the equipment. UKRI will decide the strategic location for these items and will potentially fund them at 100%. The ESRC will have flexibility in relation to the funding of equipment to negotiate with potential grant recipients to achieve best value from the limited funds at its disposal.

For all items of equipment requested above the UKRI equipment purchase threshold (£115,000) three equipment quotations must be provided. Where you believe that there are less than three potential suppliers for an item you should explain this in the 'Justification of Resources' attachment and upload two blank documents as equipment quotes. For items of equipment which cost less than the UKRI equipment purchase threshold it is optional to provide quotations and up to three can be uploaded.

Social surveys - Social survey costs which are being sub-contracted should be included under this section and are eligible for fEC exception funding at 100% (for the amount sought from the Council). (See 'other directly incurred costs' section if surveys are to be done using in-house resources.)

Other directly incurred costs - including justified; project specific consumables, consultancy fees, equipment costing less than £10,000, recruitment and advertising costs.

Costs for social survey work proposed to be done using in-house resources should also be included under this section and will be funded at the standard 80% fEC funding rate. Proposals including such costs will need to fully justify why the work should not be subject to external competition, and provide benchmarking or other data to support a case that best value for money is being achieved through using research organisation staff rather than external contractors.

All project costs relating to UK business, civil society or patient and public involvement co-investigators must be prefixed as 'UK Co-I's business or civil society costs'. The co-investigator salary costs must be entered under 'Other Directly Incurred Costs' as should all other claimed staff salaries and related costs associated with the UK co-investigator's business or civil society body, and should be marked as an 'Exception' using the tick box.

All costs associated with international co-investigators, whether salary, fieldwork, equipment or travel and subsistence should be entered as 'Other Directly Incurred Costs' and should be marked as an 'Exception' using the tick box. All costs should also be prefixed with 'Overseas.'

All costs relating to UK business and/or civil society co-investigators and/or international co-investigators must be specifically justified, and applicants must explain why such costs are required to achieve the aims of the research project. Applicants must also state clearly in the 'Justification for Resources' attachment of the Je-S form which costs in the application relate to UK business, civil society or international research organisations. Please note UK business, civil society and international co-investigator salary costs should only be claimed where clear justification is provided as to why this cost cannot be met by the UK business, civil society or international research organisation.

Other directly allocated costs - including support staff salaries, a share of the costs of departmental support staff and the costs of access to major research facilities.

Estates and indirect costs

Estate and indirect costs are specific to each research organisation, and do not require justification in your case for support.

Research organisations that have implemented the TRAC costing methodology and have passed the Quality Assurance process should apply their own estate and indirect costs. Non-research organisations that are not required to implement TRAC must have a robust costing methodology in place that has been validated in order to apply their own estates and indirect cost rates. The standard default rates should be used where research organisations have not yet developed their own rates.

Your Research Office will be able to assist with this section.

Interventions and NHS Costs

For guidance on including costs relating to interventions and NHS costs please refer to the 'Guidance on Interventions and NHS costs' document which can be found at:

<https://esrc.ukri.org/funding/funding-opportunities/esrc-nihr-dementia-research-initiative-2018/>

Project partners

If you have secured a commitment from another organisation or funding body to provide additional resources for this project, the details of that support should be entered here. A letter of support from each partner organisation confirming the level of support specific to this proposal must be included as an attachment via this section.

Timetable

Provide a clear timetable for the project and the intended progress of the research through the different stages. Your planned timetable can be expanded upon if necessary within your case for support.

Data collection

Applicants must adhere to ESRC policy. Please refer to the full statement on data management planning and datasets deposition requirements for data intensive investments in the ESRC Research Data Policy (<https://esrc.ukri.org/funding/guidance-for-grant-holders/research-data-policy/>) and in the Research Funding Guide (<https://esrc.ukri.org/funding/guidance-for-applicants/research-funding-guide/>). Explain clearly

how you will meet these requirements if relevant to your proposal. Complement but do not duplicate the information provided in the Data Management Plan as explained below.

Reviewers (academic and user)

Nominate two academic and two non-academic/user reviewers. These people must not be from the same research organisation as any of the investigators on the project, and should not represent potential conflicts of interest. **Agreement should be sought from nominated reviewers before their details are submitted.** We may contact one of each 'type' of reviewer to assist in the peer review of your proposal.

Proposals will not be disadvantaged by the absence of nominated reviewers.

Classifications

Please identify whether the research will involve significant collaborative contributions from colleagues outside of the UK. If 'yes' please expand within the 'Case for Support' attachment.

User involvement

If 'Users' have been/will be engaged with your research project, please specify the nature of their engagement. 'Users' are individuals, groups or organisations who have an interest in or may benefit from the research. Users may be from the public sector, private sector, civil society or the wider public in general. Engaging users in your research from its conception and development through to the dissemination stage is likely to increase the impacts achieved. Applicants should expand upon how the proposed work will be managed to engage users and beneficiaries in the pathways to impact attachment.

Attachments

It is important that applicants **only submit the supporting attachments specified in this document**. We reserve the right to reject applications that do not include the required attachments or include attachments not specified in this guidance. It is recommended that attachments are uploaded in PDF (rather than Word) format, to ensure unsupported font type issues do not cause problems with maximum length requirements, please see Je-S guidance; <https://je-s.rcuk.ac.uk/Handbook/pages/SystemRequirementsFormatsandSa/SystemRequirementsFormatsandSa.htm>

The following are mandatory Je-S attachments for this call:

- Case for support
- Justification of resources
- Pathways to impact
- Data management plan
- CV
- Patient and public involvement (to be uploaded as an 'Other' type attachment)
- Management plan (to be uploaded as an 'Other' type attachment)

If you are including NHS costs the following attachments are mandatory:

- Additional Costs Proforma: NHS Support and Treatment costs (to be uploaded as an 'Other' type attachment)
- Letter(s) of Support from the appropriate NHS organisation(s)

If you are including associated studentships the following attachments are mandatory:

- Letter(s) of Support from the Director(s) of the relevant DTP(s) or CDT(s)
- Project (associated) student request (maximum two A4 sides)

If you are including project partners the following attachment is mandatory:

- Letter(s) of Support from the relevant organisation(s)

List of Publications, Letter of Support, Proposal Cover Letter, Facility form, Final/Interim Report and Other are optional attachments and should be included where necessary according to the call guidance.

Important note: If you are unclear about whether you can include a specific attachment please contact dementia@esrc.ukri.org for advice, as unrequested attachments can hinder the processing of your application. ESRC reserves the right to return or reject proposals that include attachments not permitted on this call.

Case for support (maximum of 12 sides of A4)

This is the body of your research proposal. It must not exceed 12 pages and must include the following sections:

- The introduction should set the aims and objectives of the study in context. It should briefly sketch the main work on which the research will draw, with references. Any relevant policy or practical background should be included.
- State how the proposed research fits into the initiative specification and what contribution it will make to the initiative.
- The detailed research questions to be addressed should be clearly stated.
- Give a full and detailed description of the proposed research methods. Particular care should be taken to explain any innovation in the methodology or where you intend to develop new methods.
- Clearly state the framework and methods for analysis, and explain the reasons for their choice.
- Indicate the expected outputs both academic and those orientated to (potential) users (articles, papers, datasets, events, etc). Where possible, describe the expected impact.
- Describe the career development and capacity building activities that will be undertaken as part of the award.
- Outline your approach to engagement of research users and patient and public involvement (you may refer here to your Pathways to Impact and Patient and Public Involvement attachments).
- If the research involves data collection or acquisition you must demonstrate that you have carried out a datasets review, and explicitly state why currently available datasets are inadequate for the proposed research.
- The bibliography for references cited in the proposal should be attached under the 'list of publications' document; this should not include publications not cited in the proposal. A list of the most relevant and recent publications should be included in the applicant CVs.

NIHR Research Design Service

The NIHR's Research Design Service (RDS) supports a range of people, including academics, doctors and health professionals, to develop and design high quality research proposals for submission to NIHR funding programmes and other open, national, peer-reviewed funding competitions for applied health or social care research.

RDS advisers in regional centres across England offer a unique breadth of experience and a proven track record in improving funding applications. Their advice is free and confidential. They can help research teams with a range of activities including research methods, identifying potential academic, clinical and lay collaborators, health economics and interpreting feedback from funding panels.

Further details including how to contact your regional RDS are available at:

<https://www.nihr.ac.uk/about-us/how-we-are-managed/our-structure/research/research-design-service/>

Dementias Writing Group support for clinical grant applications

Portfolio Development Groups (PDGs) provide advice and support for researchers working together to submit grant applications for clinical studies.

The Dementias PDG (<https://www.nihr.ac.uk/research-and-impact/research-priorities/dementias-portfolio-development-group.htm>) composed of experts and lay members, promotes the development of innovative ideas into funded research. Of specific relevance to the dementia-focused ESRC/NIHR funding call is the support that can be offered by Writing Groups to formulate and write grant applications. The Writing Groups are time-limited and comprise researchers who wish to collaborate to take a research idea into a submitted grant proposal.

Expressions of interest from researchers interested in applying for Writing Group support are now being accepted. Support offered includes:

- practical advice over expertise, applicants, patient involvement and study design
- logistical support for writing group meetings and post-award advice.

If you are interested in receiving support from the Dementias PDG, please complete the following form: <https://goo.gl/forms/VTXWKf5q9WYNfg9iI>

If you have any queries, please contact admin.nddr@nihr.ac.uk

Justification of resources (maximum of two sides of A4)

A two-side A4 statement justifying that the resources requested are appropriate to undertake the research project. The justification of resources should explain why the resources requested are appropriate for the research proposed, taking into account the nature and complexity of the research proposal. It should not be simply a list of the resources required, as this is already given in the Je-S form. Where you do not provide explanation for an item that requires justification, it will be cut from any grant made.

Please refer to the UKRI Je-S <https://je-s.rcuk.ac.uk/Handbook/pages/GuidanceonCompletingaStandardG/CaseforSupportandAttachments/ESRCspecificRequirements.htm> for further guidance.

You should use the justification of resources document to describe and justify any intervention (NHS or other) costs associated with the project, regardless of whether they will be claimed from ESRC or from the intervention or NHS provider.

Pathways to Impact (*maximum of two sides of A4*)

While the Impact Summary section of the Je-S form is for applicants to explain who will benefit from the research and how, the Pathways to Impact attachment should be used to explain what will be undertaken by the applicant to ensure that opportunities for users to benefit from your research, and thus for achieving economic and societal impact, are maximised. There will be patient and public members of the commissioning panel who may refer to this section of your proposal in particular in their assessment.

The Pathways to Impact is your opportunity to describe how the potential impacts of your research will be realised. This attachment is specific to users and beneficiaries of the research who are outside of the academic research community including, for instance, the public sector, private sector, civil society or the wider public in general. User communities for ESRC research may include bodies and individuals from industry, charities, universities, local authorities and other public bodies, government departments and independent policy bodies.

Potential academic beneficiaries of your work and pathways towards achieving academic impact should not be detailed in this attachment but in the 'Academic Beneficiaries' section of the Je-S form and the 'Case for Support' as appropriate.

In describing plans to maximise impact, applicants should consider what is achievable and expected for research of this nature. If you do not feel that your research has potential to achieve impact outside of academia, you should use the Pathways to Impact attachment to explain why this is the case. However, it is expected that applicants will have considered impact in its broadest economic and societal terms before coming to this conclusion. Applicants should note that while we recognise the value of this type of research, reviewers may comment on the applicant's reasoning during consideration of the proposal. Impact can take many forms, manifest at different stages in the research process, and be promoted in different ways. It may be helpful to consider impact in respect of the short term (during the currency of the grant), medium term (up to one year afterwards), and the long term. A statement about our expectations of the research we fund is at <https://esrc.ukri.org/funding/guidance-for-applicants/impact-innovation-and-interdisciplinarity/>.

Please detail how the proposed research project will be managed to engage users and beneficiaries and increase the likelihood of impacts.

When completing the attachment, please consider and address the following:

- Clear mapping of beneficiaries and target audiences
- Analysis of demand for research outputs
- Strategy for engagement with target audiences
- Methods for communication and engagement
- Opportunities for collaboration
- Monitoring and evaluation of impact plan activities.

For further detailed guidance please access the relevant ESRC specific attachment Je-S helptext page. You may also wish to refer to ESRC's Impact Toolkit: <https://esrc.ukri.org/research/impact-toolkit/>

To be effective, all communication, engagement and impact activities must be planned in detail and properly resourced. **To this end it is recommended that approximately 10% of the overall budget should be dedicated to delivering the project's impact strategy as outlined in the Pathways to Impact attachment.**

Data Management Plan (maximum of three sides of A4)

It is a requirement of the ESRC Research Data Policy <https://esrc.ukri.org/funding/guidance-for-grant-holders/research-data-policy/> that all applicants planning to generate data as part of their grant must include a Data Management Plan. The Data Management Plan should be used as an opportunity to describe how the data, ie primary input into research and first-order results of that research, are going to be managed - starting from planning for research and through the life-cycle of the grant until data is accepted for archiving by the UK Data Service.

The ESRC recognises the importance of research data quality and provenance. Research data generated by ESRC-funded research must be well-managed by the grant holder during the grant period to enable their data to be exploited to the maximum potential for further research. For further guidance see the Je-S Helptext.

CV (maximum of two sides of A4 per person)

A CV for each applicant and named research staff member must be included. For researchers this should include contact details, qualifications (including class and subject), academic and professional posts held since graduation, a list of the most relevant and recent publications, and a record of research funded by the ESRC and other bodies. This should not exceed two A4 sides.

For members of the public, patients, service users or carers please include an attachment (maximum two A4 sides) to tell us about your knowledge, skills and experience that are relevant to this proposal. You are not required to provide a CV. Please provide a summary of any relevant knowledge, skills and experience that you will draw upon to contribute to this project. This could include information about:

- Previous or present work (paid or unpaid) with any relevant organisations
- Links with any relevant groups, committees, networks or organisations
- Experience of particular health conditions, treatments, use of services - or as a member of a particular community
- Knowledge and experience of research including previous research undertaken
- Knowledge and experience of patient and public involvement including previous involvement activities
- Skills from any other roles that are transferable
- Relevant qualifications, training and learning

List of publications

The bibliography for references cited in the proposal only should be attached. Please note publications not cited in the proposal should not be added here. A list of the most relevant and recent publications by the applicant should be included in the applicant CV.

Final/interim reports (*maximum of three sides of A4*)

All current grant holders included as a principal or co-investigator in this proposal must submit a progress report on their current awards with any new application. Details should include the output records submitted by the applicant to the Researchfish system.

Proposal cover letter/letter of support (*maximum of one side of A4*)

Exceptionally letters of support can be submitted as part of a proposal. Only letters of support that are essential to the successful conduct of the research (for example, confirming access to datasets, or confirming access to or use of the facilities provided by named organisations) can be submitted with an application. Letters of support from relevant NHS organisation(s) should be submitted if such costs are included, and letter(s) of Support from the Director(s) of the relevant DTP(s) or CDT(s) must be submitted where associated studentships are requested. General letters of support that are not essential for the successful conduct of the research or do not confirm any specific contribution to the project must not be included.

Other attachments (including a project (associated) student case for support if applicable)

Patient and Public Involvement (*maximum of one side of A4*)

Describe your approach to patient and public involvement including details of what involvement has already been undertaken to develop the proposal, what involvement is proposed in the steering and running of the study and what involvement is planned to develop the full proposal. The estimated budget for patient and public involvement should be described. There will be patient and public members of the commissioning panel who will refer to this section of your proposal in particular in their assessment. In their proposals, applicants should differentiate between the value of user involvement in the development and delivery of the research, and the impact and benefit of the research. Please refer to 'Guidance for applicants on involving patients, families and carers' for further information on this: <https://esrc.ukri.org/funding/funding-opportunities/esrc-nihr-dementia-research-initiative-2018/>

Management Plan (*maximum of one side of A4*)

Applicants must explain how they will provide leadership to a potentially diverse group of collaborators, how the proposed programme of activities and its outputs will be managed and the role and function of any advisory or management groups. This should include how various work streams in the proposal would be co-ordinated and managed.

Interventions and NHS Costs

For guidance on costings relating to interventions and NHS costs please refer to the 'Guidance on Interventions and NHS costs' document which can be found at:

<https://esrc.ukri.org/funding/funding-opportunities/esrc-nihr-dementia-research-initiative-2018/>

Applicants including NHS costs are required to complete an 'Additional Costs Proforma: NHS Support and Treatment costs' which should be submitted as an attachment to your Je-S form. The form can be found at: <https://esrc.ukri.org/funding/funding-opportunities/esrc-nihr-dementia-research-initiative-2018/>

A 'Letter of Support' from the lead NHS provider acknowledging the amount requested and confirming that these are the likely costs must also be included with the proposal. It will be your responsibility to ensure these costs are verified by your organisation.

Project (associated) student request (maximum of two A4 sides)

All proposals including one or more project (associated) studentships must include a separate case for support for each studentship for which ESRC funds will be used. Please see ESRC-specific project student Je-S helptext for guidance on information to include in the attachment.

Proposal classifications

The information provided in this section will be used by us to identify appropriate peer reviewers. It would therefore assist us greatly if you could populate the Research Area/Qualifiers/Keyword sections to provide a comprehensive description of your area of expertise.

The Proposal classification area is a harmonised (and expanded) structure agreed with other UKRI councils. Therefore, if your area of expertise crosses the remits of more than one UKRI council you will now only need to provide the information once.

It is an essential requirement that your **primary research area** is in the social sciences. We strongly encourage inter/multidisciplinary working both within and beyond the social sciences, as long as at least 50% of the proposed programme of research is within ESRC remit. Please refer to the list of research areas that fall within ESRC remit (<https://esrc.ukri.org/funding/guidance-for-applicants/is-my-research-suitable-for-esrc-funding/discipline-classifications/>) for further information. Please note this information is used to determine eligibility for ESRC funding and to assist in the selection of appropriate reviewers.

Submit your proposal

After all mandatory sections have been completed, the submit button will appear across the top menu bar. Please ensure that you have **completed all attachments** that are not standard mandatory attachments for Je-S but are a **mandatory requirement to be completed for this specific call**. The submit button will route your finalised proposal to the authorising facility within your organisation (as explained in the Registration section above).

Please note that the proposal must be formally submitted by your organisation before **16.00 on 18 July 2018**.

Commissioning timetable

- Call for proposals issued – 24 May 2018
- **Deadline for submitting proposals – 16:00 on 18 July 2018**
- PI Response to reviewer comments – September 2018

- Commissioning Panel meeting – Mid October 2018
- Decisions to applicants – Late October 2018
- Grants start – 1 January 2019

Tracking your proposal

There are additional document maintenance actions that can be undertaken via the Document actions button. For example, the 'Show submission path' will indicate to you where in the organisation submission chain the proposal currently is located (and who holds current responsibility) – such as: owner, approval pool, submitter pool or submitted to Council.

Further enquiries

Enquiries relating to ESRC research funding rules and proposal procedures should be addressed to:

- Cora Jaitner
Email: dementia@esrc.ukri.org
Telephone: 01793 41 3101
- Sarah Lobo
Email: dementia@esrc.ukri.org
Telephone: 01793 41 3036

Enquiries relating to technical aspects of the Je-S form should be addressed to:

- Je-S helpdesk
Email: jeshelp@rcuk.ac.uk
Telephone: 01793 444164
